

Will the broadcast flag interfere with consumers ability to make copies of DTV content for their personal use, either on personal video recorders or removable media?

What will be the impact to my ability to make copies of DTV content for my personal use?

Would the digital flag interfere with consumers ability to send DTV content across networks, such as home digital networks connecting digital set top boxes, digital recorders, digital servers and digital display devices?
Will I be able to freely transmit DTV content between devices within my home?

Would the broadcast flag requirement limit consumers ability to use their existing electronic equipment (equipment not built to look for the flag) or make it difficult to use older components with new equipment that is compliant with the broadcast flag standard?
What happens to my ability to use equipment that I previously purchased that will not have this capability?

Would a broadcast flag requirement limit the development of future equipment providing consumers with new options?
Who or what agency will be responsible for approving an equipment manufacturer from making the equipment with flag capability?

What will be the cost impact, if any, that a broadcast flag requirement would have on consumer electronics equipment?
What is the cost per home to implement this scheme?
